“Let’s Help a Neighbour in Need!”

Maeve Field

Maeve Field is a 5-year-old girl who suffered life altering injuries after she was struck by a car in March 2019.

Maeve’s left arm & right leg suffered irreparable damage & were amputated. Her left eye and a section of her jaw were also severely damaged unfortunately.

All of these major injuries have resulted in medical procedures such as plastic surgeries, skin grafts, bone grafts, treatment for a deadly Mucor fungus, multiple jaw and dental surgeries, periodontal (gum) surgery and related transplants, much of which will continue indefinitely.

Basic prostheses for mobility & related medical treatments are only partially covered. Ian, her father turned down a job & has not worked since the accident so he could be Maeve's full-time caregiver & support person....
