Matteo Zammuto

Matteo is a 16 1/2-year-old young man who is nonverbal autistic and is in grade 11 at Assumption College High school in Brantford. He is developmentally aged 3-4 years old. He is high needs and requires assistance with everyday life skills.

In October 2023, Matteo experienced his first grand mal seizure. Over the course of 2 1/2 years, he has been hospitalized on 3 different occasions. He has since been diagnosed with epilepsy. We are still undergoing testing to try and find some answers as to why these seizures continue to happen. Matteo is without coverage for physical and occupational therapy and well as dental coverage.
